Mute Projector Black Screen

Display & Camera Controls Provides specific display and camera device control

Input/Source Selection Allows you to select which sources you want to view on the room displays

Media Volume Control

Advanced Mode Provides further options for routing content in rooms with multiple displays. **Flip over for further instructions**

Room System Shut off

ShareLink: The ShareLink allows you to connect your laptop or mobile device "wirelessly" to the display. Select this button and follow the onscreen instructions.

LAPTOP: Selecting the laptop button will route a laptop to the room display. You can connect your laptop using the provided VGA or HDMI cables at the podium.

Rack PC/Mac: Selecting these buttons will route the rack PC or Mac to the display. You may also have to turn on the computer by pressing its main power button.

Bluray: Selecting Blu-ray will route the podium Blu-ray player to the room display.

Doc Cam: Selecting the Doc Cam button will route the Document Camera to the room display.

Presentation Cam: Room camera can be displayed on screen and used through the room PC for lecture capture and web conferencing.

Instructors:

Please log in using your KU Online ID and password.

Don't forget to log out.
To log out, double click the log out icon on the PC desktop.

If another class does not immediately follow yours, please shut down the system. (System off)

Analog (VGA)

Digital (HDMI)

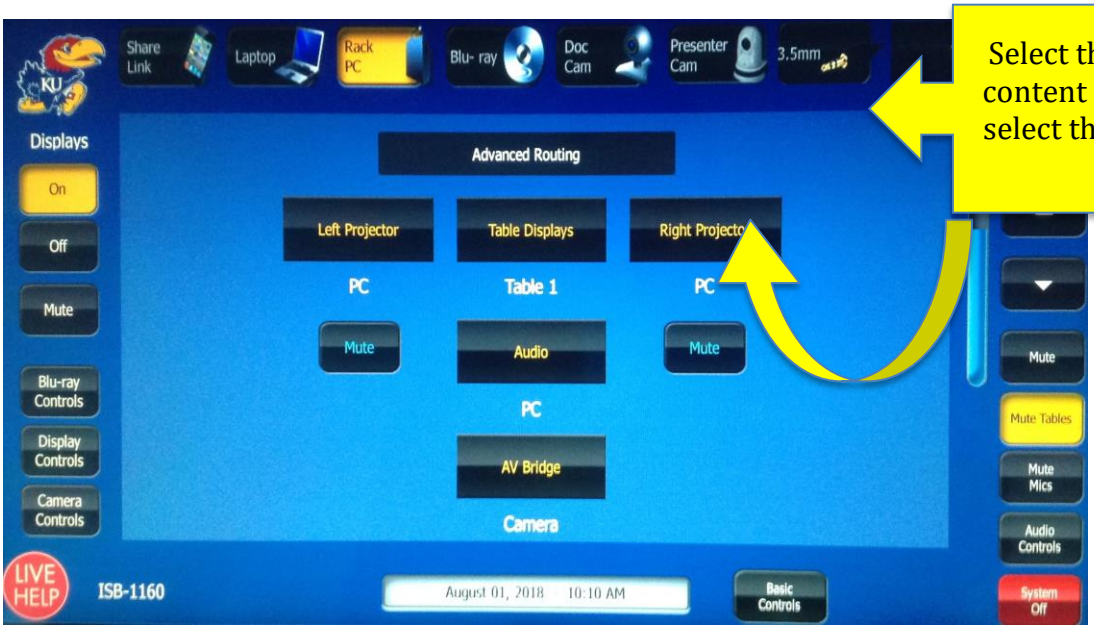
"Advanced Mode"

Selecting "Advanced Mode" will display destination buttons available to route various content to multiple displays.



Select the source content first, then select the display.

Table Select
Allows you to send individual table content to main displays and/or to all other table displays

"Table Select"

Tables 1 to 1
Resets all tables so they display their own content
